# The authortitle-comp style

This style is a compact version of the authortitle style which prints the author only once if subsequent references passed to a single citation command share the same author. This style will implicitly enable the sortcites package option at load time.

### Additional package options

#### The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option dashed. Setting dashed=false in the preamble will disable this feature. The default setting is dashed=true.

### Multiple citations

Aristotle, Physics, Poetics, Rhetoric; Averroes, Possibility of Conjunction
