

## The verbose style

This citation style prints a verbose citation similar to the full bibliography entry when an item is cited for the first time. All subsequent citations will then use a shorter author-title format. This style is intended for citations given in footnotes.

## Additional package options

### The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.
