NAME

kpsereadlink – print contents of symbolic link

SYNOPSIS

kpsereadlink *file*

DESCRIPTION

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, **kpsereadlink** will always fail.

OPTIONS

kpsereadlink accepts the following additional options:

--help   Print help message and exit.

--version

Print version information and exit.
