NAME

showglyphs – create a *pdf* file that shows all glyphs in a font

SYNOPSIS

showglyphs *fontfile*

DESCRIPTION

This program creates a *pdf* file that shows all glyphs in a given font.

FILES

font

This can be any Type 1 or TrueType font; OpenType fonts are not (yet?) supported.

RESTRICTIONS

- **showglyphs** only works on Unix/Linux systems.

- **showglyphs** needs a working, TDS-compliant Tex installation
