NAME

texconfig – configures teTeX

texconfig-sys – configures teTeX system–wide

SYNOPSIS

texconfig

texconfig-sys

DESCRIPTION

texconfig allows to configure and maintain *teTeX* in an easy and convenient manner. It uses the *dialog* program to draw nice input boxes. After answering the dialoges, the appropriate files are changed automatically and all necessary steps are involved to apply the new settings.

SEE ALSO

dialog(1), *initex*(1), *mf*(1), *vi*(1), *EDITOR* environment-variable.
